

The following release notes describe changes in Event 1 Integrator between revisions 2.82.0015 and 2.82.0019. Please read them carefully before you use the new software.

Contents

Compatibility Section 1
 Integrator database compatibility *Section 1.1*
 Prolog Manager *Section 1.2*
 Sage Timberline Office 9.5 *Section 1.3*
Documentation Section 2
Software Changes Section 3
 Installation *Section 3.1*
 Licensing *Section 3.2*
 Menus *Section 3.3*

Section 1 - Compatibility

- 1.1 **Compatibility with Integrator database created by previous versions**
 The Integrator database structure has changed. After installing this version, when you will be notified that the database must be upgraded when you open a connection. The upgrade will be automatic.
 - 1.2 **Compatibility with Prolog Manager**
 No changes were made with respect to compatibility with Prolog Manager. This version remains compatible through Prolog Manager 2008.
 - 1.3 **Compatibility with Sage Timberline Office 9.5**
 Beginning with this version, Integrator is compatible with Sage Timberline Office 9.5. This version remains backward compatible with Sage Timberline Office 7.5 through 9.4.1.

Section 2 - Documentation

- 2.1 **Documentation**
 There have been no changes to the documentation with this release.
-
-

Section 3 - Software Changes

3.1 Installation

The installation process includes a new step that prompts you to specify the path for the Event 1 System folder. This folder will be used to store the license file, connection files, and other information that should be shared between computers that have Integrator installed. To avoid needing to re-license your software and to take advantage of the benefits to having shared files, we recommend that you identify a path on the same mapped network drive where your Sage Timberline Office applications are installed.

3.2 Licensing

With previous versions of the software, licensing was performed via a manual process involving submission of a request followed by a response with license keys that you needed to hand enter. Beginning with this version, licensing tasks can be completed automatically. Integrator will connect directly to the Event 1 license server to obtain license keys and update your license information.

3.3 Menus

This version includes a new menu system that replaces the prior 'Switch board' paradigm. The new menus provide faster access to frequently used tasks.
